

Transition PTT Unit for Mobile Radios

Part # TransPTT/NP-xx

Transition PTT & Headset Interface

From the chosen mobile connector a straight lead runs through a slim-line Transition PTT (push to talk) unit, with 360 degree rotating clip. An internal amplifier is fitted allowing connection of various headsets via the Nexus headset socket. A protection dust cap is fitted for when no headset is present. An additional 2.5mm socket on the TransPTT housing allows for connection of remote finger & foot PTT switches.

FEATURES

- Slim-line PTT with 2.5mm socket for remote PTT option
- 360 degree rotating belt clip
- Nexus socket, allow quick connect / disconnect of headsets
- Sealed dust cap for when headset is removed
